

Business & Corporate Finance

Foster Garvey Business attorneys help companies navigate an increasingly complex operating environment and work with them to understand their business goals and priorities in order to find the right solutions for their organizations. We advise United States-based and international clients across many jurisdictions and industries, including entertainment and media, retail and consumer products, hospitality, food and beverage and technology, among others. Additionally, our extensive experience allows us to capably serve the needs of companies in highly regulated industries such as transportation, banking and financial services, health care and telecommunications.

Given increasing scrutiny of corporate governance, every corporation needs to review its corporate structure and make the changes needed to comply with its responsibilities. This review requires close attention to a variety of conduct and activities, everything from board oversight to financial disclosures, to fiduciary obligations, to corporate social responsibility, to Sarbanes-Oxley requirements. We provide strategic guidance on these and other corporate governance issues to corporate management, boards of directors, board committees and shareholders.

Foster Garvey's Business practice is well-known throughout the Pacific Northwest and beyond and is consistently recognized as a top corporate practice by *Chambers USA*, *U.S. News/Best Lawyers*® and *IFLR 1000*. The firm's Business team provides comprehensive legal services including business counseling, corporate finance, emerging company and venture capital, regulatory reporting and compliance, mergers and acquisitions, joint ventures and strategic alliances, securities, intellectual property and tax.
