

The Complex Science of Regulatory Compliance: Ways to Protect Your Laboratory Investment

Seminar

May 17, 2011 | 10:00 a.m. - 11:00 a.m.

Webinar

In our upcoming complimentary webcast, two leading experts on compliance issues for laboratories, Rina Wolf and David Gee, will share their insights and tips on how to put an effective and efficient compliance program in place.

Are you confident your policies, procedures and systems ensure compliance without bogging down your organization? [Register today](#) to see where you stand. We'll cover:

What is the current compliance climate and how does it affect your lab?

Why the cost of failure far outweighs the price of success.

Developing an effective compliance plan—identifying the key elements and participants.

Why auditing and monitoring is crucial and how to leverage existing systems to streamline the process.

How the right billing system and support will help to ensure compliance.

Practical and cost-effective ways to use outside legal resources—when you need them, and when you don't.

Whether your lab is transitioning from concept to commercial enterprise, or is already commercialized, you won't want to miss this information-packed one hour webinar. [Join us](#) and make the science of regulatory compliance work for you.
