

California Bottle Bill Webinar: WA Wine Institute

Webinar
February 1, 2024 | 10:00am PST

Address all of your need-to-knows about the California Bottle Bill during Washington Wine Institute's upcoming webinar featuring experienced professionals in the alcohol industry, Emily Gant and Adena Santiago. Last year, California added wine and spirits bottles to California's beverage container recycling program. Starting January 1, 2024, every Washington winery that ships wine to California needs to register with California's CalRecycle, file monthly reports, and pay processing fees as wine is shipped into their state. Also, starting July 1, 2025, wine bottle labels for wine in California will be required to include CRV, or California Redemption Value.

Emily and Adena will detail the recent changes, products subject to the new requirements, the required markings and labels, how to register for the program, and more.
