

## Improving Collections for Homeowner Associations

May 18, 2011

**Event Sponsor: Greenbaum, Rowe, Smith & Davis LLP Webinar**

Join us for a **FREE** webinar on May 18 from noon to 1 p.m.

Payment of maintenance, special and other assessments are the life blood of every community association. In the current environment, it has become more difficult and slower to get paid. This webinar will address practical solutions that a community association can implement to improve the percentage and speed of collections.

### **Why Attend**

Collections is a process that relies upon prompt and vigorous implementation by knowledgeable debt collectors. Success starts with the creation of a policy tailor-made to meet the needs of each community association. The process flows into diligent enforcement of that policy as soon a unit owner falls into arrears. And it ends, most optimistically, with prompt payment of the assessments.
