4:00 - 5:15 p.m., Registration will begin at 3:30 p.m.

October 8, 2015

The Offices of Hodgson Russ LLP, 140 Pearl Street, Buffalo, NY

Rapid technological advancement, tightening government regulations, and an increasingly demanding consumer base has paved the way for a manufacturing revolution. And with change of this magnitude comes unprecedented opportunities and challenges.

Buffalo Manufacturing Works, operated by leading engineering and technology organization EWI, is dedicated to helping the region's manufacturing sector keep pace with that revolution and stay competitive in a global economy. Funded in part by Governor Andrew M. Cuomo's Buffalo Billion Investment Development Plan, Buffalo Manufacturing Works, located in a state-of-the-art, 22,000-square-foot facility on the Buffalo Niagara Medical Campus, helps innovation-driven organizations excel by partnering with their internal manufacturing, engineering, and R&D teams to deliver better products and stay competitive.

At this exclusive event presented by Hodgson Russ LLP, attendees will gain insight on the factors propelling the manufacturing revolution and learn how Buffalo Manufacturing Works' unique portfolio of capabilities can help them keep ahead of change, drive innovation, and grow their manufacturing business.

Registration will begin at 3:30 p.m. A cocktail reception will follow the program.

***Please RSVP by Thursday, October 1, 2015.***

This seminar is complimentary. Seating is limited.
