“A New Era of Manufacturing in a Global Economy” Kicks Off Series

Hodgson Russ is proud to sponsor World Trade Center Buffalo Niagara and EWI New York’s 2014 Manufacturing Renaissance Series. The events highlight manufacturing in the Buffalo-Niagara region through the lens of companies engaged in the local rebirth of manufacturing.

The first program, “A New Era of Manufacturing in a Global Economy,” was held September 24, at d!g, the Innovation Center at the Buffalo Niagara Medical Campus.

The two-part series is exploring workforce development, automation, new product development, global distribution, funding streams, and best practices using the know-how of companies that have successfully navigated these processes.
