

MNOSHA Legislative Changes

Zoom Webinar (free)
12.14.2023 | 1:00-2:00 p.m. (CT)
Event Sponsor: OSHA Environmental Compliance Systems (OECS)

In 2023, MNOSHA brought several legislative changes and initiatives, leaving us with many questions about how the changes will impact different industries.

Join Aaron Dean, a top-rated construction law attorney, as he discusses these changes and shares how contractors can mitigate the negative impacts brought about by the implementation of these changes.

During this webinar, you will learn about the following:

- MNOSHA fines doubling, now tracking with Federal OSHA's fine schedule.
- MNOSHA change regarding the right to interview employees without an employer's representative present, potentially increasing employer liability.
- MNOSHA citations will now become public information 20 days after the employer receives the citation, even if the employer contests the citation.
- The National Emphasis Program (NEP) based around heat hazards establishes "heat priority days" where an employer has an increased responsibility to protect workers from heat hazards.
- The proposed Federal OSHA rule to allow union representatives or grassroots organizers to accompany government inspectors on walk-around inspections of job sites.
- MNOSHA provisions that go above and beyond Federal OSHA's requirements.
- Continuous reports of anonymous complaints seeming to target merit shop contractors.
