

Cannabis, CBD & Hemp

When Illinois implemented its Compassionate Use of Medical Cannabis Pilot Program, medical cannabis industry members turned to Amundsen Davis as their voice during the rulemaking process, and later for advice in the highly-competitive application process. Since then, as Illinois and other states have legalized adult and recreational use of cannabis, Amundsen Davis has emerged as the leading full-service firm in the Midwest counseling the cannabis industry nationwide. Our attorneys understand the difference between CBD and THC. They understand the significance of hemp production and what it means for businesses anticipating the legalization of cannabis. Most importantly, they understand the regulatory challenges cannabis business owners face.

The cannabis industry faces all the legal challenges more traditional industries face, as well as unique challenges posed by the complex regulatory schemes states have adopted and the conflicts between federal and state laws. Amundsen Davis's cannabis attorneys work closely with attorneys from its other practice groups to provide the type of collaborative and sophisticated legal services this industry needs, and that were previously difficult for industry members to find.

Amundsen Davis offers the following services to the cannabis industry, as well as businesses that wish to work with the cannabis industry:
