

Workers' Compensation and Safety Conference

Illinois Chamber of Commerce, Webcast
November 4, 2020

The Illinois Chamber strives to provide the Illinois business community with timely information to ensure employers are up-to-date in all realms of business. Workers' Compensation is no different. This confusing and often abused statute is one employers and their employees need to be familiar with to in order to stay in compliance. This conference is designed not only to inform, educate and assist employers on how to be in compliance, but also to show employers how to reduce their workers' comp costs in the process. Agenda this year will include many of the current topics pertinent to ALL Illinois employers.

This conference will be held online - live general sessions followed by workshops and exhibitor time. The website will be available and online for 6 months following the event for attendees to view ALL presentations, and visit all exhibitors.

Matt Horn presents a breakout session, "OSHA Updates for 2020 and Beyond," offering practical tips and advice for how to effectively avoid and manage an OSHA inspection. It will also cover a number of important updates relating to OSHA, including enforcement trends for 2020-21 and how it is handling COVID and COVID-related inspections.
