

What is Generative AI & How Does it Work?

Speaking Engagement
Brookfield, WI
September 12, 2024
Event Sponsor: ACC-WI

John Pienkos and Tom Pienkos provided a high level overview of AI from the viewpoint of AI technologists during their session, *What is Generative AI & How Does it Work*, at ACC-WI's Artificial Intelligence Boot Camp.

The program was designed to help in-house counsel understand the issues involved with AI and machine learning and provide best practices for a successful and compliant deployment. In addition to the education and overview, the Boot Camp offered an interactive simulation/case study to better prepare attendees to address these issues, and a practical, take-home guide outlining a framework and providing resources for successfully advising on the use of AI and machine learning in the workplace.
