

Artificial Intelligence: Concerns and Solutions for In-House Counsel

Speaking Engagement

ISBA Corporate Law Departments; Webcast

March 19, 2024 | 11:00 AM – 12:05 PM

As more attorneys use artificial intelligence, it's important to be aware of the new developments and concerns of this growing technology. Join Caroline Mazurek Cozzi for an introduction of the basics and learn what is on the horizon.

Learning objectives include:

- What artificial intelligence really is;
- Terms of use for AI and the potential surprises that can arise (such as indemnification exposure);
- The terms and conditions of AI platforms;
- The laws and regulations that have been recently passed about AI;
- The intellectual property concerns resulting from the use of artificial intelligence, including loss of trade secret protection, loss of registrability, and risk of infringement claims via the content used to train AI; and
- The recent cases and issues that may impact your client, including the use of AI to make decisions about healthcare and employment.
